FAQ
New! Explore sky in Google Earth
Google Earth | Free
Google Earth combines the power of Google Search with satellite imagery, maps, terrain and 3D buildings to put the world's geographic information at your fingertips.
• Fly to your house. Just type in an address, press Search, and you'll zoom right in.
• Search for schools, parks, restaurants, and hotels. Get driving directions.
• Tilt and rotate the view to see 3D terrain and buildings, or look up to explore the sky
• Save and share your searches and favorites.
Since Google Earth was launched, users have been exploring our world and creating content overlays (KML files) to share their explorations with others. We're now highlighting user-created KML files each week in the new Google Earth Gallery. You can also choose to add the gallery's Google Gadget to your iGoogle page.

Summary

Red Hat, Inc. (Red Hat) is engaged in providing open source software solutions to the enterprise, including its core enterprise operating system platform, Red Hat Enterprise Linux, its enterprise middleware platform, JBoss Enterprise Middleware Suite (Boss Enterprise Middleware), and other Red Hat enterprise technologies. The Company employs an open source software development and licensing model that uses the collaborative input of an international community of contributors to develop software. In addition, under the open source licensing model, the collectively developed software is distributed under licenses, such as the GNU General Public License and GNU Lesser General Public License, permitting access to the human-readable source code of the software. Red Hat is organized primarily on the basis of three geographic business units: the Americas; Europe, Middle East and Africa (EMEA) and Asia Pacific. In June 2007, Red Hat acquired substantially all of the assets of MetaMatrix, Inc. More from Reuters »

Google Image Labeler
rsgranne@gmail.com | Help | Sign Out
Google Image Labeler
Welcome to Google Image Labeler, a feature of Google Search that allows you to label images and help improve the quality of Google's image search results.
Begin as guest
Change your nickname
How does it work?
You'll be randomly paired with a partner who's online and using the feature. Over a two-minute period, you and your partner will:
View the same set of images.
Provide as many labels as possible to describe each image you see.
Receive points when your label matches your partner's label. The number of points will depend on how specific your label is.
See more images until time runs out.
After time expires, you can explore the images you've seen and the websites where those images were found. And we'll show you the points you've earned throughout the session.
Tips:
You may click the "pass" button if you can't think of any more labels for an image. If you and your partner both click "pass," you'll see the next image but receive no points for the passed image
You'll receive more points for matches with more descriptive labels. For example, this image can be described by the labels: sky (50 points), bird (60 points), soaring (120 points), or frigate bird (150 points).
What do you need to participate?
Just an interest in helping Google improve the relevance of image search for users like yourself. If you log in to your Google account, we will keep track of your points for you. You may also enter a nickname, but we do not require either a nickname

Google Web Search Features
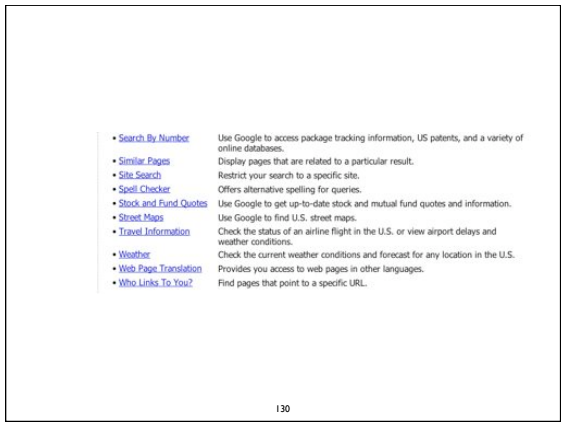
In addition to providing easy access to billions of web pages, Google has many special features to help you to find exactly what you're looking for. Click the title of a specific feature to learn more about it.
• Book Search — Use Google to search the full text of books.
• Cached Links — View a snapshot of each page as it looked when we indexed it.
• Calculator — Use Google to evaluate mathematical expressions.
• Currency Conversion — Easily perform any currency conversion.
• Definitions — Use Google to get glossary definitions gathered from various online sources.
• File Types — Search for non-HTML file formats including PDF documents and others.
• Groups — See relevant postings from Google Groups in your regular web search results.
• I'm Feeling Lucky — Bypass our results and go to the first web page returned for your query.
• Images — See relevant images in your regular web search results.
• Local Search — Search for local businesses and services in the U.S., the U.K., and Canada.
• Movies — Use Google to find reviews and showtimes for movies playing near you.
• Music Search — Use Google to get quick access to a wide range of music information.
• News Headlines — Enhances your search results with the latest related news stories.
• PhoneBook — Look up U.S. street address and phone number information.
• Product Search — To find a product for sale online, use Google Product Search.
• Q&A — Use Google to get quick answers to straightforward questions.
• Refine Your Search - New! — Add instant info and topic-specific links to your search in order to focus and improve your results.
• Results Prefetching — Makes searching in Firefox faster.
129

129

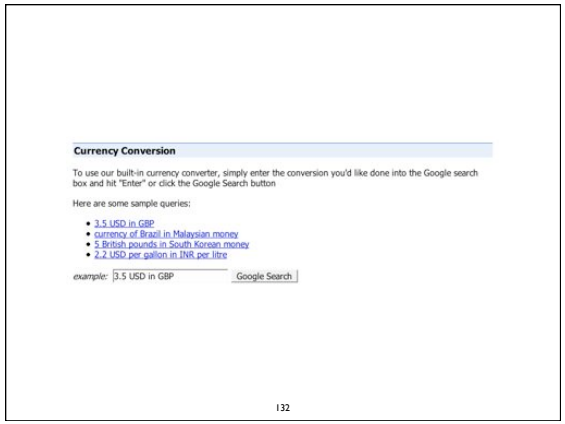


• Search By Number — Use Google to access package tracking information, US patents, and a variety of online databases.
• Similar Pages — Display pages that are related to a particular result.
• Site Search — Restrict your search to a specific site.
• Spell Checker — Offers alternative spelling for queries.
• Stock and Fund Quotes — Use Google to get up-to-date stock and mutual fund quotes and information.
• Street Maps — Use Google to find U.S. street maps.
• Travel Information — Check the status of an airline flight in the U.S. or view airport delays and weather conditions.
• Weather — Check the current weather conditions and forecast for any location in the U.S.
• Web Page Translation — Provides you access to web pages in other languages.
• Who Links To You? — Find pages that point to a specific URL.
130

130

Calculator
To use Google's built-in calculator function, simply enter the calculation you'd like done into the search box and hit the Enter key or click on the Google Search button. The calculator can solve math problems involving basic arithmetic, more complicated math, units of measure and conversions, and physical constants. Try one of the sample expressions below, or refer to our complete instructions for help in building your own.
These sample queries demonstrate the utility and power of this new feature:
• 5+2*2
• 2^20
• sqrt(-4)
• half a cup in teaspoons
• 160 pounds * 4000 feet in Calories
example: 5+2*2
Google Search
131

131

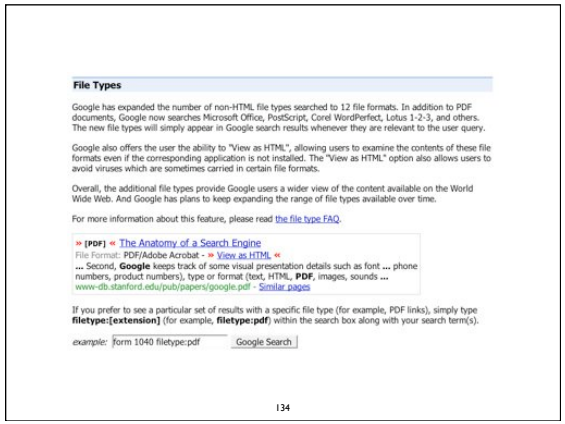


Currency Conversion
To use our built-in currency converter, simply enter the conversion you'd like done into the Google search box and hit "Enter" or click the Google Search button
Here are some sample queries:
3.5 USD in GBP
currency of Brazil in Malaysian money
5 British pounds in South Korean money
2.2 USD per gallon in INR per litre
example: 3.5 USD in GBP
Google Search
132

132

Definitions
To see a definition for a word or phrase, simply type the word "define," then a space, and then the word(s) you want defined. If Google has seen a definition for the word or phrase on the Web, it will retrieve that information and display it at the top of your search results.
example: define World Wide Web
Google Search
You can also get a list of definitions by including the special operator "define:" with no space between it and the term you want defined. For example, the search [define:World Wide Web] will show you a list of definitions for "World Wide Web" gathered from various online sources.
133

133



File Types
Google has expanded the number of non-HTML file types searched to 12 file formats. In addition to PDF documents, Google now searches Microsoft Office, PostScript, Corel WordPerfect, Lotus 1-2-3, and others. The new file types will simply appear in Google search results whenever they are relevant to the user query.
Google also offers the user the ability to "View as HTML", allowing users to examine the contents of these file formats even if the corresponding application is not installed. The "View as HTML" option also allows users to avoid viruses which are sometimes carried in certain file formats.
Overall, the additional file types provide Google users a wider view of the content available on the World Wide Web. And Google has plans to keep expanding the range of file types available over time.
For more information about this feature, please read the file type FAQ.
» [PDF] « The Anatomy of a Search Engine
File Format: PDF/Adobe Acrobat - » View as HTML «
... Second, Google keeps track of some visual presentation details such as font ... phone numbers, product numbers), type or format (text, HTML, PDF, images, sounds ...
www-db.stanford.edu/pub/papers/google.pdf - Similar pages
If you prefer to see a particular set of results with a specific file type (for example, PDF links), simply type filetype:[extension] (for example, filetype:pdf) within the search box along with your search term(s).
example: form 1040 filetype:pdf
Google Search
134

134

Movies

To find reviews and showtimes for movies playing near you, type "movies", "showtimes" or the name of a current film into the Google search box. If you've already saved your location by using Google Local, the top search result will display showtimes for nearby theaters for the movie you've chosen.

example: movies Google Search

To find theatres and showtimes near you for a currently playing movie, simply search for the movie's name.

example: Casino Royale Google Search

Can't remember a movie title, or just looking for something new to see? You can use the "movie:" operator to search for films related to a specific actor, director or plot detail.

example: movie: red pill blue pill Google Search

Want to read about the movies you find? Your search results for any film will include an average rating out of 5 stars and several snippets from online reviews, along with links to the reviews themselves. Click the "reviews" link near any title for a complete list of online reviews of this film.

135

135

Music Search

Find information about artists, songs, albums and places to buy the music you are looking for. If you enter the name of an artist popular in the U.S. into the search box, we will display user reviews, song titles, stores to purchase the music and other useful information related to that artist at the top of your search results.

example: Pixies Google Search

Pixies
Albums: Doolittle, Surfer Rosa, **Pixies**, and more...
Songs: Debaser, Wave of Mutilation, Silver, and more...

More music results for **pixies**

Click on the link to see more music information about that artist such as related albums, songs, and more.

136

136

PhoneBook

Google has added the convenience of US street address and phone number lookup to the information we provide through our search box. You'll see publicly listed phone numbers and addresses at the top of results pages for searches that contain specific kinds of keywords.

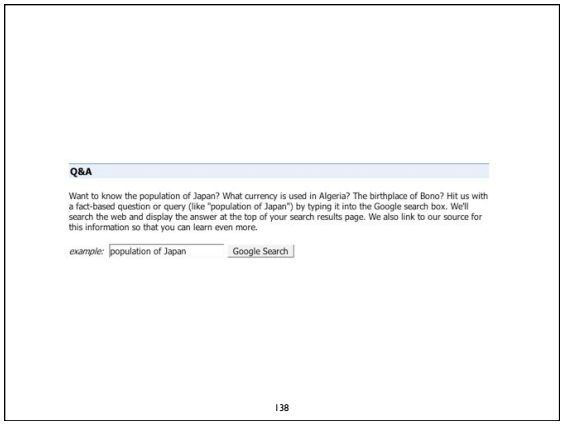
To find listings for a **US residence**, type any of the following combinations into the Google search box:

- first name (or first initial), last name, city (state is optional)
- first name (or first initial), last name, state
- first name (or first initial), last name, area code
- first name (or first initial), last name, zip code
- phone number, including area code
- last name, city, state
- last name, zip code

To have your residential phone and address information removed from the Google PhoneBook, click here.

137

137



Q&A
Want to know the population of Japan? What currency is used in Algeria? The birthplace of Bono? Hit us with a fact-based question or query (like "population of Japan") by typing it into the Google search box. We'll search the web and display the answer at the top of your search results page. We also link to our source for this information so that you can learn even more.
example: population of Japan
Google Search
138

138

Refine Your Search
For searches within certain topics, you'll notice links at the top of the search results page that help you quickly narrow your search.
Refine results for back pain:
Treatment
Tests & diagnosis
From medical establishment
For health professionals
Symptoms
Risk factors
Alternative medicine
For patients
These links are labels that have been assigned to certain webpages. Organizations, businesses, and individuals can label websites in the topics they know best. You can subscribe to more of these providers by visiting the Google Co-op directory.
example: san francisco
Google Search
example: back pain
Google Search
The Google Co-op directory also includes subscribed links, which provide instant information in your search results - things like restaurant reservations, financial info, or even celebrity gossip. Add these services to your Google search by subscribing to the providers of your choice.

Search By Number
Parcel tracking IDs, patents and other specialized numbers can be entered into Google's search box for quick access to information about them. For example, typing a FedEx tracking number will return the latest information on your package. Other special search by number types include :
UPS tracking numbers
example search: "1Z9999W99999999999"
FedEx tracking numbers
example search: "999999999999"
USPS tracking numbers
example search: "9999 9999 9999 9999 9999 99"
Vehicle ID (VIN) numbers
example search: "AAAA999A9AA99999"
UPC codes
example search: "073333531084"
Telephone area codes
example search: "650"
Patent numbers
example search: "patent 5123123"
Remember to put the word "patent" before your patent number.
example: patent 5123123
Google Search
Are there other types of numbers you'd like Google to search? Please contact us.
140

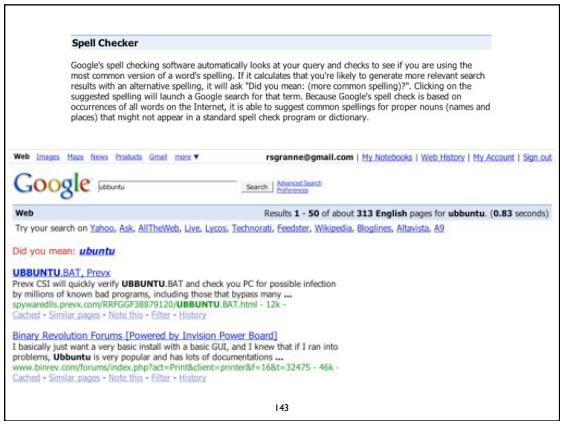
140

Similar Pages
When you click on the "Similar Pages" link for a search result, Google automatically scouts the web for pages that are related to this result.
The Similar Pages feature can be used for many purposes. If you like a particular site's content, but wish it had more to say, Similar Pages can find sites with similar content with which you may be unfamiliar. If you are looking for product information, Similar Pages can find competitive information so you can make direct comparisons. If you are interested in researching a particular field, Similar Pages can help you find a large number of resources very quickly, without having to worry about selecting the right keywords.
The more specialized a page is, the fewer results Google will be able to find for you. For example, Similar Pages may not be able to find related pages for your personal home page if it does not have enough information to authoritatively associate other pages with yours. Also, if companies use multiple URLs for their pages (such as company.com and www.company.com), Similar Pages may have little information on one URL, but lots on the other. In general, however, Similar Pages works well for the majority of web pages.
Google
... Advertise with Us - Business Solutions - Services & Tools - Jobs, Press, & Help ©2004 Google - Searching 4,285,199,774 web pages.
www.google.com/ - 3k - Mar 26, 2004 - Cached - » Similar pages «
141

141

Site Search
The word "site" followed by a colon enables you to restrict your search to a specific site. To do this, use the site:sampledomain.com syntax in the Google search box. For example, to find admission information on Stanford's site, enter:
example: admission site:www.stanford.edu Google Search
142

142



Spell Checker
Google's spell checking software automatically looks at your query and checks to see if you are using the most common version of a word's spelling. If it calculates that you're likely to generate more relevant search results with an alternative spelling, it will ask "Did you mean: (more common spelling)?". Clicking on the suggested spelling will launch a Google search for that term. Because Google's spell check is based on occurrences of all words on the Internet, it is able to suggest common spellings for proper nouns (names and places) that might not appear in a standard spell check program or dictionary.

143

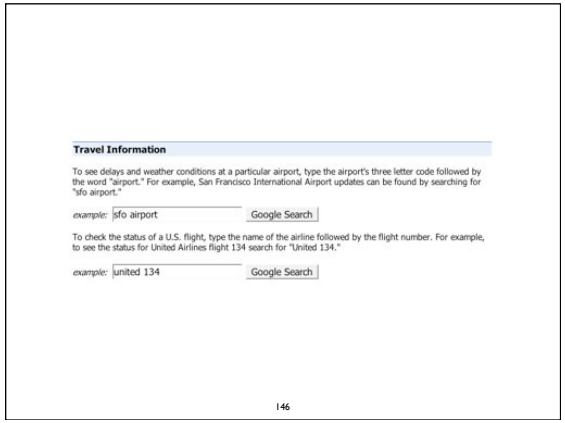
Stock and Fund Quotes
To use Google to get stock and mutual fund quotes, just enter the symbol into the search box.
example: csco
Google Search
CSCO (CISCO SYSTEMS, INC.)
Google Finance Yahoo Finance MSN Money MarketWatch CNN Money Reuters
23.24 +0.01 (0.04%) 26 Sep at 12:51PM ET
Open: 23.13 Volume: 29,660,688
High: 23.33 Avg Vol: 57,710,000
Low: 23.00 Mkt Cap: 141.07B
Click on the chart or Google Finance link to see more relevant information from Google Finance. Alternatively, you can go directly to other financial information providers for more information by clicking on the links provided. These financial information providers are selected and ordered based on popularity determined by independent third party audience measurement firms. In addition, we consider important quality factors such as download speed, user interface and functionality. If you'd like to suggest a provider we might include, please contact us.
144

144

Street Maps
To use Google to find street maps, enter a U.S. street address, including zip code or city/ state (e.g. 165 University Ave Palo Alto CA), in the Google search box. Often, the street address and city name will be enough.
example: 165 University Ave Palo Alto CA
Google Search
When Google recognizes your query as a map request, we'll show you your address on a Google map and enable you to obtain directions and store your default location.
145

145



Travel Information
To see delays and weather conditions at a particular airport, type the airport's three letter code followed by the word "airport." For example, San Francisco International Airport updates can be found by searching for "sfo airport."
example: sfo airport
Google Search
To check the status of a U.S. flight, type the name of the airline followed by the flight number. For example, to see the status for United Airlines flight 134 search for "United 134."
example: united 134
Google Search
146

146

Weather
To see weather conditions and a four-day forecast for a particular U.S. or worldwide location, type "weather," followed by the location. Usually a city name will be enough, but you may also want to include a state or zipcode or the country for worldwide cities. For example, to see Palo Alto weather, you could search for "weather palo alto, ca" or "weather palo alto 94301".
Weather for Palo Alto, CA Add to my Google homepage
59°F
Mostly Cloudy
Wind: W at 12 mph
Humidity: 40%
Tue Wed Thu Fri
61°F | 41°F 62°F | 40°F 60°F | 44°F 60°F | 43°F
If you like to see the weather of this location on your personalized Google homepage, you can do this by clicking on the button 'Add to my Google homepage' in the upper right corner.
example: weather palo alto, ca
Google Search
All weather conditions and forecasts are provided by Weather Underground, Inc.
147

147

Web Page Translation
Google breaks the language barrier with this translation feature. Using machine translation technology, Google now gives you the ability to access web pages in languages other than your own. Currently, Google offers the following translation pairs: English to and from Arabic, Chinese, French, German, Italian, Korean, Japanese, Spanish, and Portuguese; and German to and from French.
If your search results contain a page in one of these languages, and we support your translation pair, you can translate that page into your language with a single click.
For more information about this feature, please read the translation FAQ.

Who Links To You?
Some words, when followed by a colon, have special meanings to Google. One such word for Google is the link: operator. The query link:siteURL shows you pages that point to that URL. For example, link:www.google.com will show you pages that point to Google's home page. You cannot combine a link: search with a regular keyword search.
example: link:www.google.com
Google Search

Introducing Android
On Nov 5th, the Open Handset Alliance announced Android, a software stack for mobile devices including an operating system, middleware and key applications. Android was built from the ground-up to enable developers to create compelling mobile applications that take full advantage of all a handset has to offer. Developers can create applications for the platform using the Android SDK, which is now available.

Google Experimental
Check out Google's latest ideas
Google Labs > Experimental search
Google is always experimenting with new features aimed at improving the search experience. Take one for a spin and let us know what you think.
New! Join an experiment and you'll see that feature whenever you do a Google search. Note that you can only join ONE experiment at a time.
Alternate views for search results
Join this experiment
See results on a timeline, map, or in context of other information types. With these views, Google's technology extracts key dates, locations, measurements, and more from select search results so you can view the information in a different dimension.
Timeline and map views work best for searches related to people, companies, events and places. Info view shows all the data found for each result, to help you select the best choice.
Try out one of these queries
View on a timeline: thomas jefferson, civil rights movement, nanotechnology
View on a map: pga tours, olympics, bioinformatics conferences
View additional info: space exploration, cars, koalas
Keyword suggestions
Join this experiment
Try different keywords to improve your search results. As you type your search, Google's technology provides alternative suggestions to your queries in real time. This feature is also

Reader Help Center

Are there any keyboard shortcuts?

Keyboard shortcuts save you time by helping you quickly explore your reading list without moving your hand back and forth between your keyboard and mouse. Here are the keyboard shortcuts for Google Reader:

j/k	item down/up	selects the next/previous item in the list
space/shift-space	page down/up	moves the page down/up
n/p	scan down/up	in list view, selects the next item without opening it
o	open/close item	in list view, expands or collapses the selected item
enter	open/close item	in list view, expands or collapses the selected item
s	toggle star	stars the selected item
shift-s	toggle share	shares the selected item
m	mark as read/unread	switches the read status of the selected item
t	tag an item	opens the tagging field for the selected item
v	view original	opens the original source for this article in a new window
shift-a	mark all as read	marks all items in the current view as read
1	expanded view	displays the subscription as expanded items
2	list view	displays the subscription as a list of headlines
r	refresh	refreshes the unread counts in the navigation
shift-n/p	navigation down/up	selects the next/previous subscription or folder in the navigation

Dream. Design. Communicate.

New! Build your Campus in 3D Competition (Australia and New Zealand)

Developed for the conceptual stages of design, Google SketchUp is a powerful yet easy-to-learn 3D software tool that combines a simple, yet robust tool-set with an intelligent drawing system that streamlines and simplifies 3D design. From simple to complex, conceptual to realistic, Google SketchUp enables you to build and modify 3D models quickly and easily. If you use Google Earth, Google SketchUp allows you to place your models using real-world coordinates and share them with the world using the Google 3D Warehouse.

- **Simple**: Learn the small toolset quickly
- **Fast**: Model as fast as you think
- **Powerful**: Design anything from a shoebox to a skyscraper
- **Flexible**: Make your models loose/conceptual or tight/accurate
- **Fun**: Place your models in Google Earth

Google SketchUp 6	Free

Google SketchUp 6 is a 3D modeling software tool that's easy to learn, simple to use, and lets you place your models in Google Earth. Are you remodeling a kitchen, landscaping your back yard or adding a deck to your home? Google SketchUp makes it faster, easier and a lot more fun. From simple to complex, from conceptual to realistic, Google SketchUp helps you see your vision before you build it.

Once you've built your models, you can place them in Google Earth, post them to the 3D Warehouse.

Learn more about Google SketchUp 6

Google SketchUp Pro 6	$495

Google SketchUp Pro 6 is a 3D modeling software tool that allows designers and planners to explore, communicate and present complex 3D concepts. Its import/export capability gives you the speed and functionality for use in a professional workflow. And now, with SketchUp Pro 6's LayOut (beta) feature, you can integrate 3D models with 2D elements to create compelling interactive presentations. LayOut (beta) also enables you to output large-format, high-resolution documents.

Estate Vacanza 2007: The Plains (vedi anche Estate Vacanza 2005: Nord)
Panoramica del software sociale (OpenOffice.org, PDF o Flash)
Non Clicca sulla Blue E!: Perché Tu Se Passa a Firefox (6,7 MB PDF, 5,6 MB di PowerPoint, 4,2 MB Flash)
L'interoperabilità tra Windows e Linux (1,1 MB PDF)
WU: Sito Web Design e Sviluppo Syllabus, Autunno 2007
Scott Granneman è un autore, educatore, e di imprenditore a St Louis, Missouri. Scott ha scritto tre libri - Non Fare clic sul Blue E!: Passaggio a Firefox, Hacking Knoppix, frasario e Linux - e ha contribuito a due: Ubuntu Hacks Vista e Microsoft per la sicurezza IT Professional. Inoltre, egli è un mensile editorialista di SecurityFocus, e per Linux Magazine. Egli è un Professore a Washington University di St Louis, corsi di insegnamento di tecnologia, di sicurezza, e di Internet. In qualità di principale di WebSanity, pensa, si sviluppa, e ospita siti web per i clienti in nove Stati usando un basato su Unix sistema di gestione dei contenuti. Egli ha dato presentazioni in tutto gli Stati Uniti, e ama parlare con la gente.
Scott ultimo libro
Linux
L'idea alla base di Linux frasario è di dare esempi pratici di Linux comandi e la loro miriade di opzioni, con esempi per tutto. Troppo spesso un utente Linux sarà un comando al fine di scoprire come funziona, e mentre il comando e le sue numerose opzioni saranno dettagliate, qualcosa di vitale importanza sarà lasciato fuori: esempi. Ecco dove Linux viene frasario ho coprire un numero enorme di comandi e le loro diverse opzioni, e per ogni singolo, dò un esempio di utilizzo e di risultati, che rende chiaro come usarlo.

Google Web Accelerator

253

253

254

254

2. How does Google Web Accelerator work?

Google Web Accelerator uses various strategies to make your web pages load faster, including:

- Sending your page requests through Google machines dedicated to handling Google Web Accelerator traffic.
- Storing copies of frequently looked at pages to make them quickly accessible.
- Downloading only the updates if a web page has changed slightly since you last viewed it.
- Prefetching certain pages onto your computer in advance.
- Managing your Internet connection to reduce delays.
- Compressing data before sending it to your computer.
