

Our main SLUUG event is

Digital Intrusion & Digital Privacy: What THEY Know, What YOU Don't

by [Scott Granneman](#) and [Denise Lieberman](#)

Surveillance by strangers, by criminals, by the police, and now by government agencies. How do they do it? What are the ramifications, legally and technologically? How is the current situation brought about by Edward Snowden different historically? How do you protect your communications? And how do you answer those who say "If you're not doing anything wrong, then your government surveillance shouldn't bother you"?

SLUUG General Meeting on Wednesday - 11 September 2013

The St. Louis Unix Users Group (WWW.SLUUG.ORG) general meetings are usually on the second Wednesday of each month.

We usually start the general meeting with a basic session; which may include either simple tutorials, displays of newly discovered web sites, command line wonders, demonstrations of useful applications, amazing graphical packages, major resolution of long standing anomalies, blinking lights, or quantum shifts in both time and space.

There will not be a basic session this month because of our main presentation.

This month we will start exactly at 6:30 PM with a quick welcome, introduction, administrative announcements, and a very short Questions and Answers Period.

After all that, we take a break before our main event, which we will try to start as close to 7:00 PM as possible.

Where: [Graybar Electric Co., Inc.](#), facility at 11885 Lackland Road, Maryland Heights, MO 63146

Scott Granneman

Scott Granneman is an author, Adjunct Professor, and partner in a technology firm.

Scott has written six books — Don't Click on the Blue E!: Switching to Firefox, Hacking Knoppix, Linux Phrasebook, Podcasting with Audacity, Google Apps Deciphered, and Mac OS X Snow Leopard for Power Users — and contributed to several more. In addition, he was a columnist for SecurityFocus, The Open Source Weblog, and Linux Magazine.

As an educator, Scott has taught thousands of people of all ages - from pre-teens to senior citizens - on a wide range of topics covering everything from technology to literary representations of Hell. He is currently an Adjunct Professor at Washington University in St. Louis, where he teaches courses on Technology & the Law, Using Everyday Technology, Web Development, From Blogs to Wikis, Technology for Managers, and Technology in Our Changing Society.

As a Principal of WebSanity, he works with businesses and non-profits to plan, develop, and host websites using a robust open source Content Management System. In particular, he manages the firm's UNIX-based server environment, writes all the documentation, and works closely with other partners on the company's software and systems.

Denise Lieberman

A very special guest speaker at our 11 September 2013 SLUUG General Meeting:

Denise Lieberman is a civil rights lawyer and adjunct professor who specializes in constitutional law, civil rights, and civil liberties. She is a senior attorney for Advancement Project, a national civil rights organization based in Washington DC., where she specializes in voting rights and election law. She analyzes election policy, engages in advocacy with election officials and oversees nonpartisan voter protection activities for Missouri, organizing hundreds of monitors and lawyers to address voter issues on election day.

Denise is also an adjunct professor at Washington University School of Law and Department of Political Science where she teaches courses on civil rights and constitutional law, including courses on the Supreme Court and Bill of Rights, National Security and Civil Liberties, Voting Rights, Technology and the Law, and Gender and Law. For the past five years, Denise served as visiting faculty lecturer in political science there.

She brings 15 years of civil rights experience to her work. She previously served as Legal Director of the American Civil Liberties Union of Eastern Missouri, where she litigated many impact constitutional and civil liberties cases in state and federal courts, including cases protecting freedom of speech, religious freedom, privacy, racial justice, government oversight, and more.

Denise is the recipient of the Martin Luther King Human Rights award, the Hershel Walker Peace and Justice Award, the Democracy in Action Award and the John Doe Society Award for free speech.
